STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total leaf tobacco stocks smaller than a year ago.

Leaf tobacco inventories of dealers and manufacturers in the United States and Puerto Rico totaled 4,590 million pounds as of July 1, 1969. This was 268 million pounds less than the figure a year earlier. All but one domestic type registered a decline with flue-cured showing the largest loss. Foreign-grown cigarette and smoking tobacco stocks continued a steady increase. About 35 million pounds, consisting mostly of Maryland and Puerto Rican tobaccos were marketed by growers during the April - June quarter.

Stocks as of July 1, 1969 included 1,183 million pounds (farm-sales-weight) of leaf tobacco under Government loans -- 14 million pounds above the previous July 1 (1,169 million). Flue-cured and burley accounted for the entire increase as all other types declined and Maryland was phased out of the loan program completely. The breakdown on current loan stocks was: flue-cured, 800.5 million pounds; burley, 348.3 million; fire-cured, 14.4 million; dark air-cured, 15.3 million; and cigar leaf, 4.8 million pounds.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks. (See table in body of report for reported weight basis). This report is issued quarterly.

2/ All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks--reporting spurposes.

CIGARETTE-LEAF STOCKS

Flue-cured, burley, and Maryland stocks smaller;
Foreign stocks larger

Stocks of flue-cured tobacco on July 1, 1969 totaled 2,100 million pounds -- 201 million less than reported holdings last year. The 1968 marketing year for flue-cured ended on July 1 with total disappearance indicated at 1,197 million pounds (1,221 million for 1967). Domestic consumption at 672 million pounds was about 15 million below the previous year. Exports were 525 million pounds compared to 533 in 1967-68.

Burley stocks this July 1 were reported at 1,463 million pounds -- 17 million below the holdings of July 1, 1968.

Maryland inventories totaled 84 million pounds -- 13 million less than last July 1. Auction sales of the 1968 crop ended on June 27 with 30.9 million pounds being sold.

Foreign-grown cigarette and smoking tobacco stocks were reported at 451.2 million pounds on July 1, 1969. This was 9.4 million more than was on hand a year earlier and the second largest volume on reocrd.

DARK TOBACCO STOCKS

Fire-cured smaller
Dark air-cured slight higher

Stocks of fire-cured leaf, reported at 92.5 million pounds on July 1, 1969 were 12.5 million below holdings on the previous July 1. All three types showed declines. Fire-cured stocks on this July 1 were as follows: Virginia, 12.2 million pounds; Eastern District Kentucky and Tennessee, 65.2 million; and Western District, 15.0 million.

Dark air-cured holdings of 66.7 million pounds were only 0.2 million above the July 1 inventories last year. Stocks this year by types were; One Sucker, 40.7 million pounds; Green River, 21.8 million; and Virginia sun-cured, 4.2 million.

Inventories of all domestic-grown cigar tobacco, including Puerto Rican, totaled 235.3 million pounds on July 1, 1969. This was 26.4 million less than the holdings of last July 1. All types showed declines. Deliveries of the 1968-69 crop of Puerto Rican tobacco were completed during the quarter. Stocks of foreign-grown cigar leaf as of July 1 amounted to 92.8 million pounds -- 5.1 million below holdings a year earlier.

Inventories of cigar-filler types on this reporting date totaled 158.2 million pounds -- down 14.9 million from the previous July 1. Individual type totals were: Pennsylvania Seed-leaf, 115.2 million; Ohio filler, 12.0 million; and Puerto Rican, 31.1 million pounds.

Of the total in "sheet" this July 1, 24.4 million pounds were for use in cigarette and smoking tobacco, and 2.6 million for cigar binder and wrapper.

2/ Farm-sales-weight equivalent based on unstemmed sweated weight factor.

3/ The instructions for reporting unstemmed cigar-leaf of the domestic types require that dealers and manufacturers indicate the weight basis on which the tobacco is reported, namely, farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of average factors reflecting the percentage reported each quarter in each of these three categories.

1/ Totals include stocks of leaf reported in tobacco sheet. See separate reporting in table 4.

2/ Type 73 is defined as all domestic types of tobacco not otherwise classified; the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the types to which they properly belong.

3/ Separate reporting of Mexican stocks was not required until October 1968. In previous quarters Mexican totals were included as other foreign-grown cigar-leaf.

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ The carryover stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign msnufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.
